ATHARVA DEEPAK THAKARE

Pune, India
atharvathakare16@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Computer Engineering graduate with experience in data analytics, data engineering, and machine learning through internships and end-to-end projects. Proficient in data processing, ETL workflows, data validation, predictive modeling, API development, and data visualization. Skilled in Python, SQL, Pandas, and Power BI, with working knowledge of Azure and AWS and a strong foundation in DSA, DBMS, statistics, and software engineering practices.

SKILLS

- **Programming:** Python, Java, C++, SQL
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend & APIs:** Flask, Node.js, REST APIs
- **Data & ML:** Pandas, NumPy, Scikit-learn, Matplotlib, Power BI, Tableau, Excel
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Cloud & Tools:** Microsoft Azure, AWS, Git, GitHub
- **Core:** Data Structures & Algorithms, OOP, DBMS, SDLC

WORK EXPERIENCE

Power BI Intern
KasNet Technologies Pvt. Ltd – Pune, India | Jan 2025 – Feb 2025

- Transformed raw datasets into interactive Power BI dashboards, enhancing decision-making efficiency.
- Developed custom DAX measures for complex business calculations.
- Designed dashboards with slicers and drill-downs for business reporting.

Data Analytics Intern (AI & LLMs)
VOIS for Tech Program by Connecting Dreams Foundation –Virtual | Oct 2024 – Nov 2024

- Automated data cleaning and preprocessing using Python and AI models for data analysis tasks.
- Designed predictive analytics reports featuring heatmaps, trend analysis, and AI-based insights.
- Used LLMs for advanced data extraction and analytics to support data analysis workflows.

PROJECTS

Customer & Orders Batch Data Engineering Pipeline | code

- Developed an end-to-end batch pipeline using Python and SQLite.
- Implemented schema validation, duplicate detection, malformed-record handling, rejected-record quarantine, and idempotent processing with reconciliation checks.
- Achieved 7 passing Pytest cases and benchmarked pipeline performance using synthetic datasets of up to 50,000 customers and 250,000 orders.

Disease Prediction System | live Demo | code

- Built an end-to-end Disease Prediction System using Random Forest with symptom-based feature engineering.
- Developed a Flask REST API serving top-3 predictions with confidence scores, descriptions, and precautions.
- Implemented data preprocessing for real-world dataset inconsistencies, and deployed the application on Render.

Resume–JD Match Scorer | live demo | code

- Developed and deployed a full-stack application using React.js and Node.js to analyze resumes against job descriptions.
- Implemented PDF text extraction and NLP-based matching using tokenization, keyword matching, and TF-IDF.
- Generated resume–job description relevance scores and personalized suggestions based on missing and matching keywords.

EDUCATION

Bachelor of Engineering (Computer Engineering)
Sinhgad Institute of Technology and Science – Pune, India | 2023 – 2026

Diploma (Computer Technology)
Sou Venutai Chavan Polytechnic – Pune, India | 2019 – 2022

CERTIFICATIONS

- **Microsoft Azure Fundamentals (AZ-900)** – Microsoft | Feb 2025
